

General Features

Catalogue: Our eCommerce catalogue has over 350,000 items in 12 different product categories, and we are continuously adding to it.

Checkout Now or Save for Later: Once your cart is loaded you have the option to checkout, save order or add to a list to purchase at another time.

Fulfillment Methods: Choose to ship directly to your preferred location or pick up your order at a local branch.

Customer Specific Pricing: When you log in to your account you will see product pricing that is specific to your company, including contract pricing.

Custom Shopping Lists: Create a custom shopping list to keep the items you need in one spot, such as routinely purchased items, a special list of items for a project, or a list of approved PPE. You can even set a notification to remind you to re-order.

Chat: Have a question while shopping? Use our online chat feature to get in touch with one of our representatives.

Source Now: Can't find what you're looking for? We can source it! Tell us more about your product and we will find it for you.

Getting Started

Within 24-48 business hours you will receive an activation email, inviting you to complete your ecommerce account setup.

Custom Features

Company Specific Part Numbers: If you have company specific part numbers, let us know. We can load them into our system, so you can search using your very own part numbers.

Manage Orders: View order history, current orders & track shipments.

Frequently Purchased Items: Our search engine will move the items you frequently buy to the top of your search results, saving you time when searching for a specific brand, model or size.

Stock Filtering: Filter your search results to show only those items that are currently stocked.

Self-Serve: View order history, track shipments, look up an invoice, manage lists, and budgets without the need to contact the sales or accounting department.

Personalize and Control

Workflow Engine: We offer control through 3 different buyer levels. Administrators can manage the user's level of access, requiring approval before orders are processed.

PunchOut: PunchOut is a feature that connects directly to your company's ERP system, eliminating duplicate work. Make an order online and the PO will be sent and completed through your ERP system.

Custom Reporting: All your eCommerce activity is traced to your account. Custom reports such as spend by item, user, project or period can be exported for your own records.

Restrictive Catalogues: If you want to control which products that your users have access to buy, send us a list of approved products and we can restrict your users to see only the approved items.

Budget Management: Track how you spend by setting up cost codes, project codes, GL codes or set up spending limits by period.

Combine Features: Mix and match the features above to have even more control over your Source Atlantic eCommerce account.

Custom Microsite: We can work with you to create a one-stop-shop microsite, that only you and your team will have access to.
