Vendor Managed Inventory (VMI)

A Source Atlantic Supply Chain Management Solution

Storeroom Inventory Ordering

Our Vendor Managed Inventory Program (VMI) will help you manage your low-value, high-turning stock items by using the Point of Use barcode scanner or the SA Mobile App to order inventory and reduce your overall receiving, stocking, stock-out, carrying and procurement costs.

VMI Solutions Includes:

- Custom product list and min/max quantities
- Elimination of time spent manually recording, transferring and emailing purchase orders
- Option to have a Source Atlantic Technician replenish inventory directly to your storeroom shelf
- Monthly Inventory usage reports
